TAILGATE LIFT ASSIST

SAFETY TECHNOLOGY

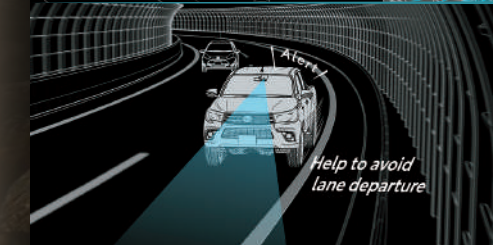

TOYOTA SAFETY SENSE

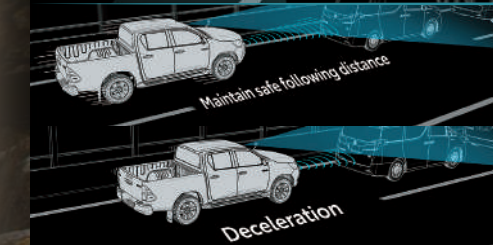

PRE-COLLISION SYSTEM

with automatically brake assisting to avoid risk and damage of car crash . Radar will detect the car in front and alert the driver

LANE DEPARTURE ALERT WITH YAW ASSIST FUNCTION

When driving out of lane without turning signal on or unintentional lane departure , the signal will be displayed on MID screen and automatically turn back the steering wheel .

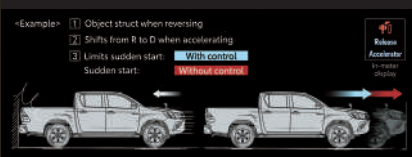

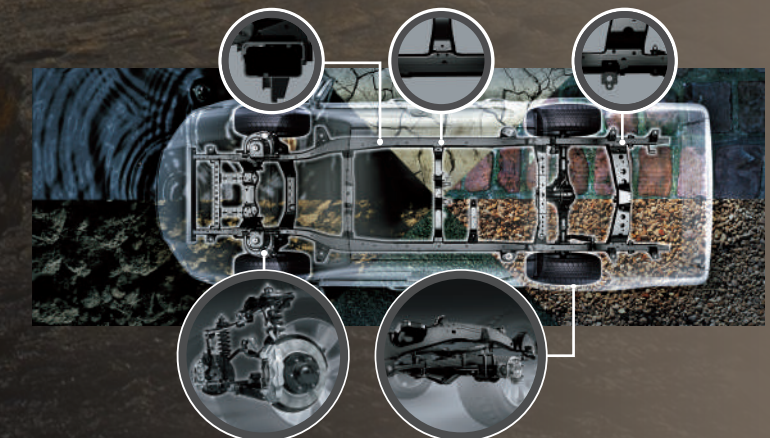

DYNAMIC RADAR CRUISE CONTROL

Control driving speed and detect the car in front with radar and automatically decrease speed to keep a safe distance , turning back to pre-set speed when there's no car in front .

FRAME WITH INTEGRATED RIGIDITY MECHANISM

The frame is designed in order to achieve maximum frame rigidity and strength. This also results in good handling stability even at high speeds, ride comfort, noise and vibration performance and collision strength.

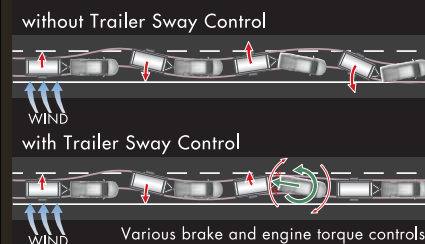

DRIVE-START CONTROL

If an abnormal shift (R->D, D->R, N->R, P->D, P->R) is detected while accelerating, a warning is displayed in the meter display and engine output is reduced to limit the acceleration, helping to avoid a collision.

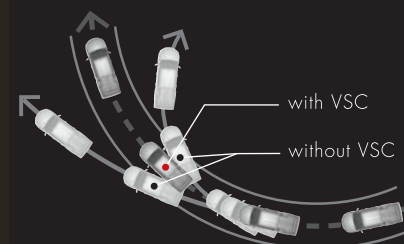

CLEARANCE SONAR

A total of 6 sonars detects stationary object near the front and rear bumpers and alert the driver to take care.

TRAILER SWAY CONTROL

When towing a trailer, the system detects trailer sway and helps to suppress it by controlling braking and engine output.

VSC

Helps prevent front or rear wheel slip while cornering by reducing engine power and applying brake force to the wheels that require it.*2

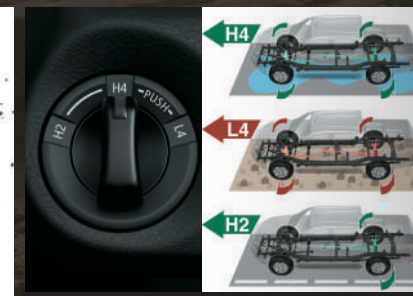

SRS AIRBAGS

The Hilux is equipped with SRS driver airbag, SRS front passenger airbag, SRS knee airbag (Driver's seat), SRS side airbags (Front seats) and SRS curtain shield airbags (Front and rear seats).*1

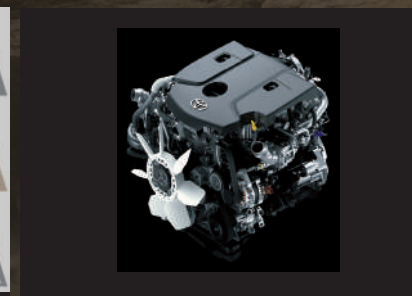

HILL-START ASSIST CONTROL (HAC)

When starting on steep hills or slippery surfaces, HAC minimizes vehicle roll-back by controlling the brake pressure as the driver switches from the brake to the accelerator.

PART-TIME TRANSFER

Highlighting driver-friendly operation, you can switch between 2WD and 4WD by simply turning the dial switch, even while moving.
